

February 23, 2006

TO WHOM IT MAY CONCERN:

We have engaged the services of Canadian K9 Detection Security & Investigation Ltd. since May of 2004. During this time, they have provided us with a number of security based services which we have focused toward building the "Polygon Difference".

They have provided security consulting for us involving over 20 construction sites in an evaluating capacity. This security and site evaluation project involves regularly visiting each site then performing an evaluation of the guard service for compliance to the Private Investigator's and Security Act and WCB as well as our own set of criteria. The site is then evaluated for safety and security overall. This project has allowed Polygon a clear insight with regard to fiscal integrity and due diligence in a pro-active manner.

Their security patrol services, with and without deterrent canines, have proven to be essential to our project security programme. Their knowledge and experience of the security field combined with their investigative processes offers a value added type of service encompassing all projects.

I would recommend Canadian K9 Detection Security & Investigation Ltd. with full confidence in their ability to provide exemplary services in the field of construction security and investigations.

Sincerely,

POLYGON CONSTRUCTION MANAGEMENT LTD.
